

Streamline your membership with a regular service review

A dedicated key account manager will work with you to make sure we're offering you the best service. That's not just an opportunity for you to give us feedback on things we could do better, but it also means we can let you know about upcoming events and services relevant to your business.

Tailor industry events and functions to your business' needs

Do you have a great idea for an event? Let us know! Our recurrent check-up also means we get to hear about the needs you see in the nuclear sector, so we can better target our offering based on observations from the coalface of the industry.

Invest in your team

Partnering with the Nuclear Institute to establish your Company Membership Scheme sends a strong message to your staff and stakeholders that you value and invest in the professionalism of your team. Engaging with the Institute and our member and volunteer networks helps to establish stronger links between your organisation, its team, and the thriving UK nuclear community.

Invest in the future of the nuclear industry – Nuclear Institute's charitable objectives

The Nuclear Institute isn't just about strengthening your business – we're about strengthening the entire nuclear industry. Our charitable objectives include advancing the education of nuclear energy, science, engineering, and technology, and increasing the public understanding of nuclear sciences and the impact on society and the environment.

By joining with us through the company membership scheme, you're becoming a more integral part of a long and proud legacy of nuclear professionalism in the UK.

COMPANY MEMBERSHIP SCHEME

COMPANY MEMBERSHIP SCHEME

BENEFITS

Display your commitment to developing nuclear professionalism

Membership at the Nuclear Institute isn't just a subscription – it's a personal commitment to uphold the highest values of professionalism in the industry. That means that your company's high standards are supported each time one of your staff joins the Institute.

Build a loyal, informed team through ongoing professional development

Staff who feel valued don't just stick around longer - they work harder, too. Investing in the ongoing professional development of your team means your people are both better informed and motivated and less likely to move on.

Through the Nuclear Institute, each of your team has the opportunity to progress to a professional membership, an independently peer-assessed standard verifying the member's nuclear professionalism.

Increase the profile of your company as an authority in the nuclear sector

The Institute's volunteering options mean your team will have opportunities to submit articles for the bi-monthly Nuclear Future, chair committees, and attend national and international events. Representing your company, your team will engage with wider nuclear community in a dynamic and supportive environment – raising your profile at a corporate level.

Maintain a high professional standard across your organisation

Nuclear Institute events are tailored to industry-specific trends and are organised at both a branch and central level. This means your team are kept constantly up-to-date with industry best-practice from top professionals in their field.

SCHEME STRUCTURE

Key Features:

- Discounted rates for members accessed through your company membership scheme
- Priority access to relevant sponsorship opportunities
- Public promotion of your involvement through NI's marketing channels
- In-house communications provided to promote membership to your team
- Tailored information about relevant events, member services and activities
- Support to create and maintain effective links between your employees and NI networks and local branches, ensuring they gain maximum benefit from their membership.
- Access and support for your staff to progress to professional membership in the NI (Member or Fellow), as independently peer-reviewed by nuclear professionals
